Microsoft AppSource - Certification Testing Notes

Excel add-in - Stripe to Xero reconciliation

Version: 1.0 beta | Date: June 2026 | Publisher: Silkview Pty Ltd | Category: Accounting & Finance

01 Add-in overview

What Silkview Connect does

Silkview Connect is a Microsoft Excel add-in (Office JS task pane) that automates reconciliation of Stripe payment data into Xero. It connects Stripe and Xero via OAuth 2.0, pulls Stripe balance transactions into Excel worksheets, builds Xero-ready manual journal and bank transaction rows using formula-driven account mappings, and pushes those entries to Xero via the Xero Accounting API - all from within the Excel task pane.

Field	Value
Add-in name	Silkview Connect
Manifest ID	6f4b82d9-1c5a-4b3d-9e28-7a1c5d9f3e4b
Task pane URL	https://addin.silkview.org/taskpane.html
Host application	Microsoft Excel (desktop and web)
Min Office version	Excel 2016 / Office 365
External services	Xero Accounting API, Stripe API
Authentication	OAuth 2.0 - Xero and Stripe, browser popup flow
Data storage	Workbook: pulled/built data in Excel. Server: OAuth tokens encrypted until disconnect.
Plans	Free (100 rows/pull, no Xero push), Pro, Firm

02 Test accounts for certification

i Use these credentials to validate the complete workflow. Xero Demo Company (AU) - sandbox only.

Silkview Connect account (add-in login)

Field	Value
Email	testsilkviewconnect@gmail.com
Password	CertReview2026!
Plan	Pro - all features unlocked
Workspace	Cert Review Workspace (pre-configured)

Xero login credentials & organisation

Field	Value
Xero username	testsilkviewconnect@gmail.com
Xero password	CertReview2026!
Organisation	Demo Company (AU)
Base currency	AUD
Connection	OAuth 2.0 - token auto-refreshes
Access level	Read accounts, tax, contacts, reports. Write journals and bank transactions.

Stripe - test mode account

Field	Value
Account	Pre-connected - TEST badge (orange) in task pane
Mode	TEST
Available data	30 days: charges, refunds, fees, payouts

03 Permissions and data access

Xero OAuth 2.0 scopes

Scope	Type	Purpose
accounting.transactions	Read+Write	Post manual journals and bank transactions
accounting.settings	Read	Chart of accounts, tax rates, tracking
accounting.reports.read	Read	Organisation/report context
accounting.contacts	Read	Contacts for bank transaction mapping
offline_access	System	Token refresh

i NOT requested: openid/profile/email, payroll, asset/file scopes, or write to Xero settings.

Stripe OAuth scope

Scope	Type	Purpose
read_write	Read (Connect)	Pull balance transactions, payouts, charges. No charge creation or fund movement.

Office JS permission

Manifest declares ReadWriteDocument. Required to create worksheets and write data. No other host permissions declared.

04 Step-by-step testing workflow

i Connections active on cert workspace. Configure Account_Mappings (Step 5) after pull and before Build.

Step 1 - Sign in

1. Insert > My Add-ins > Silkview Connect.
2. Click Sign in -> www.silkview.org/auth/login -> cert credentials.
3. Select Cert Review Workspace in the dropdown.

Step 2 - Verify connections

1. Xero card: Demo Company (AU), green dot, AUD.
2. Stripe card: TEST badge; account ticked under Accounts for pull.
3. Reconnect: button on connection card. Disconnect: www.silkview.org/dashboard.

Step 3 - Setup sheets

1. Quick setup > Setup sheets -> 7 worksheets.
2. Quick setup > Refresh Xero -> Account_Mappings dropdowns.

Step 4 - Pull

1. Pull tab: Balance Transactions, 30-day range, Pull to sheet.
2. Stripe_Balance_Transactions: 13 columns A-M, headers row 1.

Step 5 - Configure Account_Mappings

1. Open Account_Mappings sheet (after Refresh Xero in Step 3).
2. charge, refund, fee: Xero Account 200 - Sales; Tax Type OUTPUT - GST on Income.
3. stripe_clearing: 855 - Clearing Account. stripe_payout_bank: 090 - Business Bank Account.
4. Contact Mapping: Bank Transfer Contact -> Bank. Save workbook before Build.

Step 6 - Build

1. Build tab > Build journals from balance transactions -> Xero_Journals.
2. Optional: Build bank transactions -> Xero_Bank_Transaction.
3. Gross Amount column; balance validated on push.

Step 7 - Push

1. Push tab: Manual journals or Bank transactions segment.
2. Journals: range, Status Draft/Posted, Push journals to Xero button.
3. Writeback: Xero ID col I, Status col J. Verify in Xero Manual Journals.

05 Expected outcomes

Step	Action	Pass criteria
Sign in	Sign in	Workspace selector after auth
Connect	Xero card	Org + AUD, no error
Connect	Stripe card	TEST badge, account for pull
Setup	Setup sheets	All 7 sheet tabs
Setup	Refresh Xero	Account code dropdowns col B
Pull	Balance Transactions	Rows > 0, 13 cols A-M
Mappings	Account_Mappings	200-Sales/GST; 855 clearing; 090 bank; Bank contact
Build	Journals	Xero_Journals with Gross Amount
Build	Bank txs	Xero_Bank_Transaction payout rows
Push	Journals	Xero IDs col I; Status DRAFT/POSTED
Push	Bank txs	IDs and status on bank sheet

06 Network calls and data handling

Domain	Purpose	Auth
addin.silkview.org	Task pane UI + API proxy	Session handoff
www.silkview.org	Auth, dashboard, REST API	HttpOnly cookie
api.xero.com	Xero Accounting API	OAuth Bearer (brokered)
api.stripe.com	Stripe API reads	Connect OAuth (brokered)

i OAuth tokens server-side only (encrypted). Not returned to Excel. Workbook holds pulled/built data.

07 Support and contact information

Item	URL
Publisher	Silkview Pty Ltd
Support	https://www.silkview.org/support
Privacy	https://www.silkview.org/privacy
Terms	https://www.silkview.org/terms
Manifest URL	https://www.silkview.org/api/addin/manifest

i Cert account has Pro access. Report locked features via support URL with error details.
